KEY CHARACTERISTICS

- This variety belongs to a newer "family" or class of melons referred to as Extended Shelf Life Cantaloupes. ESLs offer an alternative to standard eastern shippers.
- ESL's offer a firmer background while maintaining the harvest indicators common to eastern shippers - Hermosa Beach develops a tan rind and slips easily at maturity.
- Offers great flavor - a balance of aromatics, high brix (13-15%), and traditional melon flavor.
- Firm, dark interior color with smaller cavity.
- 3-4 picks.
