

// PLANT. HARVEST. PROFIT.

RELATIVE MATURITY
98 DAYS**SW 9876ss (RIB)****SmartStax® RIB Complete®**

Tall, brawny plant with a girthier ear positioned at a more moderate height on the plant produces more average test weight grain. Silage tonnage should be top notch and the softer kernel texture is a recipe for highly digestible starch. Moves both north and south of zone and can still get the job done at a more moderate plant population. Excellent Anthracnose Stalk Rot ratings support dependable standability and plant integrity plus a good choice where Tar Spot pressure is expected to be high. Only available in a SmartStax® RIB Complete® technology trait package.
