VT Double PRO® RIB Complete®

This hybrid adds more genetic diversity to the SEEDWAY line and addresses a lot of acres in the maturity with top-shelf agronomics. Performance is on par or better than the best current products for grain and silage in the lineup with a fresh, sharp look. The ear is longer, with deep kernels and good tip fill plus the husks flare open at harvest to promote rapid drydown of high-quality grain. The plant is fairly tall and more intact later in the season, producing a lot of fodder to make a lot of high-quality feed. A widely adapted hybrid that is up to the test in all yield environments and can flex its ears under lower plant stands. Only available in a VT Double PRO® RIB Complete® technology trait package so use where Corn Rootworm is not a concern.
