

// PLANT. HARVEST. PROFIT.

RELATIVE MATURITY
91 DAYS**SW 9166****NEW!***Conventional*

A medium-statured conventional hybrid built to handle drought stress across the East Coast. Strong early vigor supports quick emergence in cooler soils, while dependable performance maintains yield across variable environments. Featuring a semi-determinant ear, higher populations are recommended to maximize yield and feed quality. A strong early-season conventional option for many acres.
