Xtendflex® Soybeans

A leader among Early-Group III varieties, this soybean pairs top-end yield potential with a stellar agronomic profile. Built for consistency, it delivers dependable early-season emergence to get your crop off to a strong start. A robust defensive package provides protection against White Mold, Brown Stem Rot, and SDS, helping safeguard performance across less favorable environments. Ability to handle the poorly drained acre as well as optimize yields in highly productive soils. Strong stems offer excellent standability and resistance to lodging, while outstanding tolerance to pre-harvest pod shattering helps protect yield when the combine gets rolling.
