NEW FOR 2027!

Enlist E3® Soybeans

Delivering phenomenal yields in our 2025 research trials, this variety stands out for its consistent performance and adaptability. Highly recommended for filling wide rows, it offers strong plant performance across diverse planting systems. A proven defensive package includes tolerance to Phytophthora, Root Knot Nematode, Frogeye Leaf Spot, and Stem Canker, providing confidence across a range of disease pressures. It performs well on high-yielding, variable, and drought-prone acres, maintaining stability when conditions fluctuate. An excellent addition to the portfolio, this variety is well suited for high salt-stress acres and serves as a strong double-crop option after wheat due to its STS tolerance.
